Extremely early, being the first in spring, and the last to yield edible pods in the fall from midsummer's sown seed, which have produced plants that are still in pod and blossom. One of the grand points of this new bush bean is in the rich green pods, which are of an enormous size, broad, thick, very long, uniform in shape, meaty and of high quality, absolutely stringless and free from any tough lining, not only when young, but this tender quality is retained to maturity. THE NEW RESPLENDENT TOMATO

This is certainly a wonder among tomatoes. The tomatoes are of many different shades as shown by the illustration, red, yellow, pink, orange, white and lemon colors, all grown on the same vine. The plant is a strong upright grower with potato-like foliage. This tomato is an entirely distinct variety and should be grown by all our customers. If you want the greatest novelty ever heard of, be sure to include the Resplendent with your order.

Pkt. 6c, 3 Pkts. 15c.

DWARF PONDEROSA TOMATO

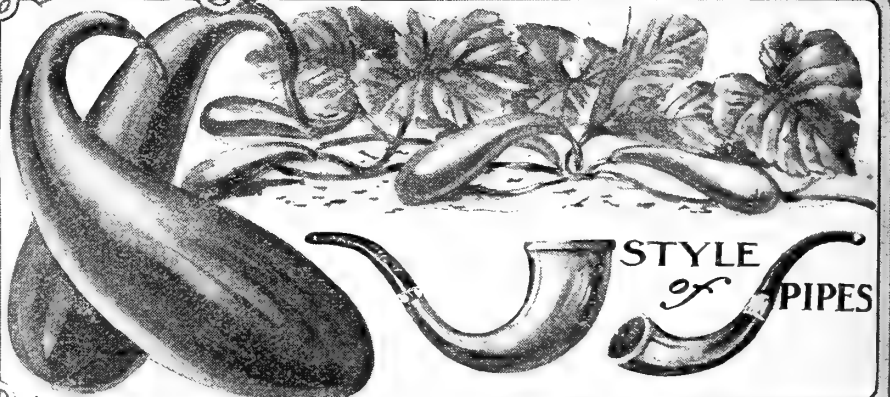

One of the finest large dwarf tomatoes ever introduced. Claimed to be a cross between the Dwarf Champion and original Ponderosa. It grows very stocky, about two feet high of the dwarf branching habit, with dark Savoy-like foliage, while the fruit is equal, if not superior to the old original Ponderosa. The color is a glossy red, and the tomatoes are borne in clusters and if planted early will furnish fruit from July until Autumn. The flavor is very rich and is a fine variety for canning, preserving or shipping. We can recommend the Dwarf Ponderosa as being one of the very best that has ever been introduced. Be sure to give it a trial.

THE NEW CALABASH PIPE GOURD

The New Calabash Pipe Gourd has caused great enthusiasm everywhere it has been grown. It is one of the most attractive gourds anyone can grow and the fact that pipes made from them are considered equal in color to Meerschauum, make them not only a great novelty, but valuable. It is claimed that Calabash Pipes made from imported South African Gourds, have been the fashion in some foreign countries a long time, but have only recently been introduced in this country. Anyone can grow this novelty in the garden, yard or any place where the ordinary gourds can be grown. From these gourds a light beautiful attractive and valuable pipe can be made. We have only a limited supply of this seed to offer.

Prices, Pkt. 8c, 3 Pkts. 20c.

Ground Almonds

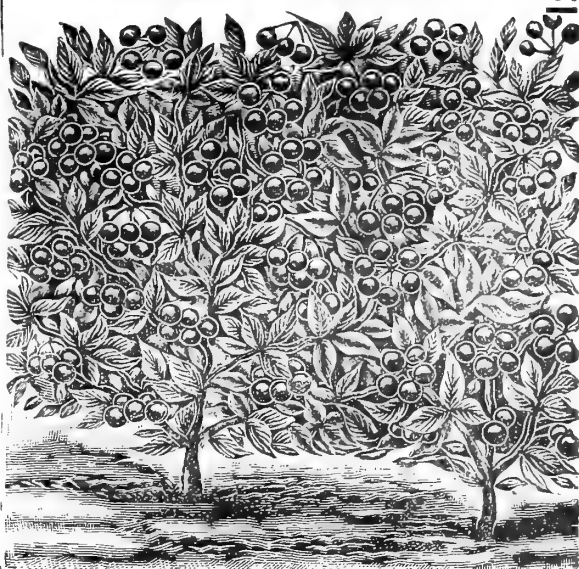

The flavor resembles the Almond. The meat is snow white covered with a thin shell or skin of brown color which is easily removed. It is very easy to grow and a single nut will yield from 200 to 300 nuts in a hill. The illustration gives a good idea of a hill growing which shows that the nuts are produced close to the surface and the foliage is of a handsome green color resembling wide blades of grass. It is a very prolific grower and will do well in any kind of soil. The nuts should be planted in the spring about the same time as corn and potatoes, and by fall they will be matured and ready to harvest. They are then dug from the ground, spread out to dry and afterwards put away for use at any time.

We consider these Ground Almonds one of the very best things we offer in our Catalogue and know that

they will be appreciated by our customers. They grow so rapidly and make such an immense and interesting crop that you will be surprised, as well as your neighbors when you tell them what you are growing. Pkt. 6c., 3 pkts. 15c., 6 pkts. 25c., 15 pkts. 50c., postpaid.

Garden Huckleberries

Garden Huckleberries

We recommend it for pies, preserves, jams, etc., when fully matured, but not good for any use in a raw or unmatured state. It is easily grown from seed and bears an abundance of fruit that ripens during the fall. Plant seed in a box or pan in the house and put out of doors when danger of frost is over. After the fruit, which is jet black in color, has matured, it is claimed that a frost will improve its quality. Pkt. 6c., 3 pkts. 15c., 6 pkts. 25c.

Chinese Lantern Plant

When treated like a tomato it grows and fruits freely from seed the first season. Produces numerous large unfolded husks, the shape of Chinese lanterns, at first a beautiful green color changing to yellow hue, then to bright scarlet. For pies, or dried in sugar for fruit cakes or puddings, it is most delicious.

For sweet pickles, pies or preserves, they are splendid, and can be used in many ways. Pkt. 4c., 3 pkts. 10c., 6 pkts. 18c., oz. 20c., 2 ozs. 35c.

WONDERBERRY

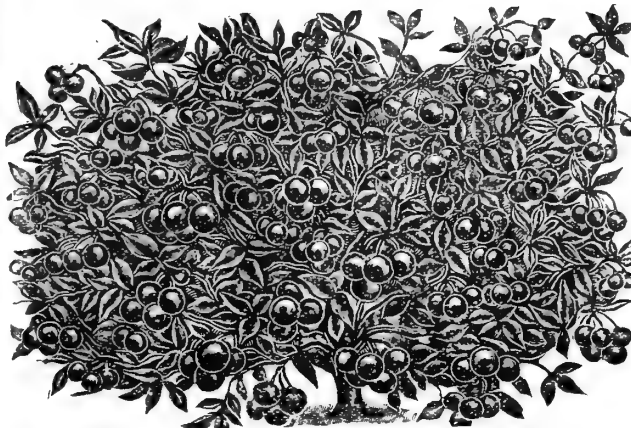

This is the berry that was so largely advertised as a remarkable new creation of Luther Burbank. ITALIAN SQUASH

Pkt. 5c., 3 pkts. 14c., 6 pkts. 25c.

ITALIAN—This Squash is similar to the Cocozelle except it only grows to half the size and never exceeds 8 inches in length. When stewed it is as delicious as the Marrow Squash, and when fried as Egg Plant is equal to it, if not better than the Egg Plant itself.

COCOZELLE BUSH

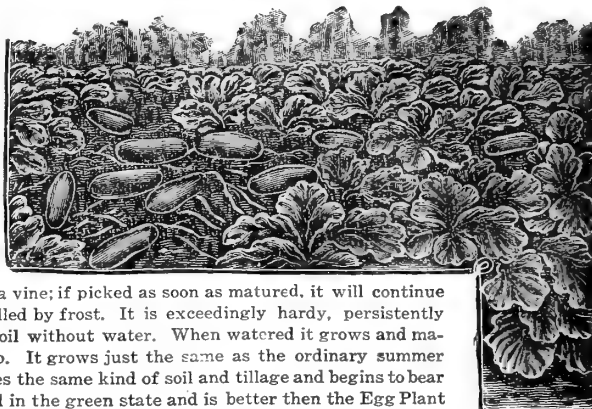

An early Squash, very prolific, one which has given great satisfaction.

The originator says:

"The point in favor of this Squash is earliness. It is easier to

cultivate than a vine; if picked as soon as matured, it will continue to bear until killed by frost. It is exceedingly hardy, persistently living in dry soil without water. When watered it grows and matures a big crop. It grows just the same as the ordinary summer squash, requires the same kind of soil and tillage and begins to bear early. It is used in the green state and is better than the Egg Plant when nicely fried in butter and well seasoned. It makes an excellent stew.

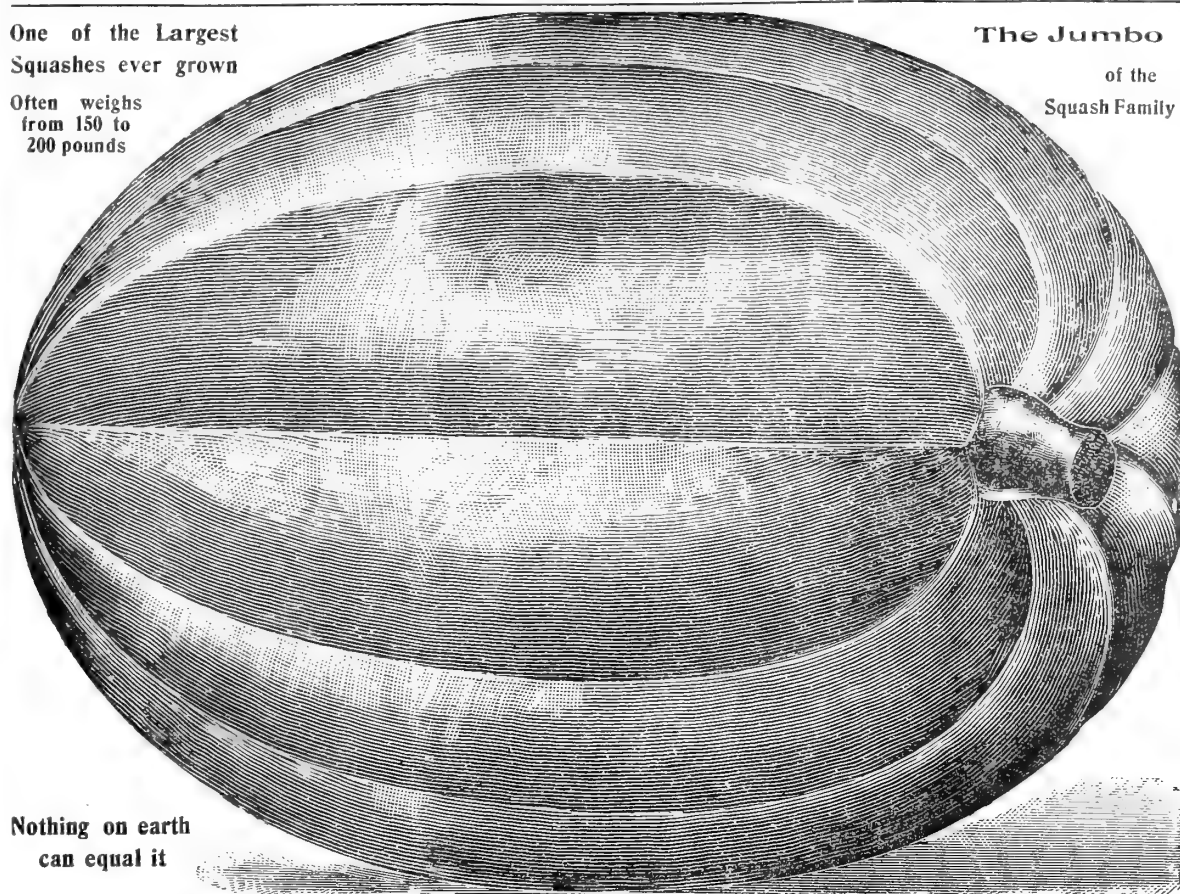

We can highly recommend this Squash. We are unable to offer larger quantities of seed than as follows: Pkt. 6c., 3 pkts. 15c., 6 pkts. 25c.

Earliana

A new perfectly smooth Tomato, and is claimed to be one of the earliest varieties grown, especially adapted for market gardeners. It is claimed that fruit has been marketed fully three weeks ahead of other varieties. It has given splendid satisfaction everywhere on account of its handsome appearance, large and uniform size, and beautiful red color. This Tomato is wonderfully productive and of the best quality, being very solid and having but few seeds. Our seed is from extra selected fruit. June Pink

This variety has only recently been introduced; is a deep pink or purplish color and somewhat resembles Earliana in growth and fruiting. The plants develop large clusters of blossoms when very small, or very soon after being planted in the garden. The fruits are borne in clusters of three, four and five; measuring from 3 to 5 inches in diameter. The flesh is sweet and of mild flavor. Try June Pink this season. JUNE PINK

THE BOUNTIFUL

If you only grow one variety of Tomatoes this year let it be the Bountiful. The introducer claims that it came from a seedling. It was quickly discovered to be an upright, strong, early blooming, quick bearing, and extremely vigorous sort. If planted in any good garden soil it will grow very fast and upright, as will be seen by the engraving.

It begins to fruit early and continues throughout the season, producing a great abundance of handsome fruit. This fruit if picked quite green, will ripen up very evenly and quickly, making it an excellent sort for pickling.

The flesh is very solid and fine grained. It is almost impossible to fully describe the Bountiful Tomato, and it should be grown to be appreciated.

Pkt. 4c., 3 pkts. 10c., 6 pkts. 18c.

Peach Tomato

Powell, the well known horticulturist, declares: "The best I have ever tested." Its canes have endured a temperature of 20 degrees below zero unharmed and it has yielded at the rate of 280 bu. per acre. Begins to ripen in mid-season, continuing for a long time.

The lamp is made of the best materials, well constructed and perfectly safe, and will hold a sufficient amount of oil to run the machine from 12 to 14 hours with one filling, always furnishing a good bright flame.

OUR REGULATOR is one of the very best on the market, consisting of an automatic corrugated compound wafer so sensitive that it will hold the temperature to a fraction of a degree. The expanding and contracting force of this thermostat is so remarkable that there is no possible chance of its failing to operate. Its action is perfect, requiring very little attention after being set to the proper point of heating. There is no complicated or delicate machinery to get out of order, no parts to become set, and it is a great improvement over all the old style thermostatic regulators.

VENTILATION—No Incubator can properly do its work satisfactorily unless supplied with a practical system of ventilation. The Wonder Hatching Machine is supplied with a most perfect ventilating system, all fumes from the lamp being carried directly into the heater and escaping through the ventilators on top of the machine. The egg chamber is thus protected from gas and impure air from the lamp. Our thermometer is the best to be obtained, and fully guaranteed.

This is certainly one of the most complete small hatching devices ever offered to the poultry raising public, perfectly self-regulating and self-ventilating, and can be relied upon to give complete satisfaction. Rex Begonia

Rex Begonias

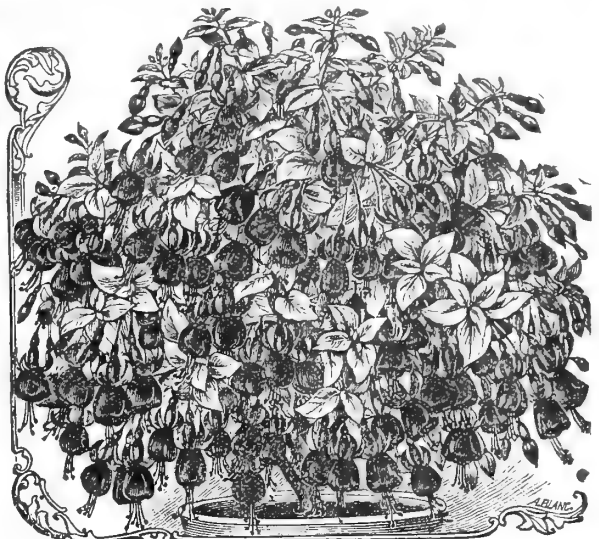

This is a type of large leaved Begonias, and is the most ornamental of the species. They are grown exclusively for the rich and varied markings and remarkable beauty of their foliage, some of which are truly marvelous. Some varieties show bright green, pure silver, bronze and velvety green, while others have a distinct band or zone of bright, rosy plum color, and others a zone of light, dull red.

Our stock of Rex consists of a number of the most beautiful varieties in cultivation, including some of the choicest new sorts. When we receive an order for two or more Rex, we always send the most distinct varieties. Price, 15c. each, 3 for 40c.

LEMON

American Wonder or Ponderosa

Quite a novelty of the citrus family, originated at Hagerstown, Md., from the seed of an ordinary lemon. The original plant when quite small bore fruit of extremely large size, much to the amazement of its originator. Cuttings from this plant produce a large stock. Horticultural experts pronounce it a cross between the ordinary lemon and the grapefruit or Pomelo, the hybridization being formed by a bee. This, in brief, is the history of the lemon. It inherited the large size of the Pomelo, and the acidity of the lemon. The plant is of rapid growth, with large dark green foliage, and often bears fruit weighing 3 to 5 pounds. Flowers are pure waxy-white and resemble orange blossoms, only larger and more compact and exceedingly sweet scented. An elegant plant for porch or lawn decoration. Very ornamental on account of its large, shiny, foliage and its wonderful immense fruit, which is produced very freely. It is of easy culture, flowering and fruiting in any good ordinary soil. The fruit is edible and may be used for all culinary purposes; no grafting or budding is necessary. 15c. each; 2 for 25c.

PALM, "Kentia Belmoreana"—The Kentia Palm, besides being one of the most graceful and ornamental of all palms for the house or conservatory, is also one of the hardiest and easiest to grow and will continue to increase in size and beauty for years. Price, 18c. each; 2 for 30c., postpaid.

VIOLETS--CALIFORNIA—This is the largest and most productive Violet in cultivation. For richness, purity of color and fragrance of flower it is unequaled. It is a single flower, and it has that sweet simplicity peculiar to the Violet. The color is pure, rich violet-blue, that does not fade. Extremely free flowering, a single plant producing hundreds of flowers throughout the season.

Double Blue Violets

DOUBLE BLUE VIOLET—Lady Hume Campbell—Certainly the most valuable double Violet in cultivation. Of strong, healthy growth and a remarkably free bloomer. Color, dark purple. So persistent is its blooming that young plants in 2 inch pots last spring were literally covered with flowers.

SWANLEY WHITE—This valuable variety is a sport from Maria Louise. It blooms as freely and is in every way equal to its parent. The flowers are large, double and pure white.

Any variety, 10c. each. 3 for 25c.

PEACH-BLOW

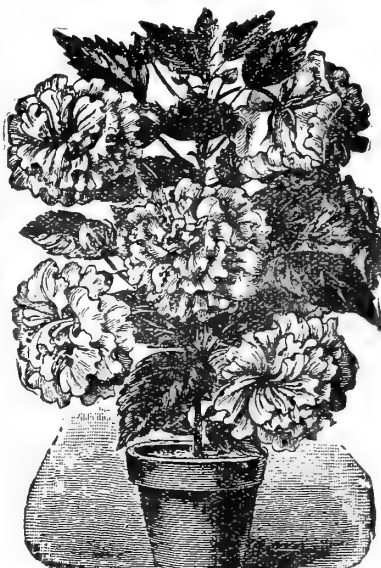

—An improvement over other Hibiscus in size of flower, freedom of bloom and strong growing qualities. The fruit is about one-half the size of an ordinary orange, and is very sweet and luscious. The blooms are produced in the greatest abundance, are delicate and beautiful in color, and rich in delicious perfume. It blooms most freely during the winter, although it is very likely to bloom at all times of the year. With one or two plants you can raise an abundance of fragrant blossoms and we know you will be more than pleased with it. Try one or two of these plants this year.

15c. each, 2 for 25c., postpaid.

CLEMATIS

GOLDEN ORIENT—(Clematis Orientalis)—A yellow Clematis. A splendid companion variety to Clematis Paniculata. The flowers are produced with nearly the same wonderful freedom, but are a bright yellow, a color not at all common in this family of plants and all the more welcome for this reason. The variety is native to the Himalaya mountains and is thoroughly hardy in all parts of this country. It grows with wonderful luxuriance and will quickly cover an arbor, veranda or pergola. Price, 20c. each, 3 for 55c., postpaid.

PANICULATA—One of the most valuable of all hardy flowering vines. Of exceedingly rapid growth, soon reaching a height of 15 to 20 feet and spreading out in all directions. Small, pure white flowers, borne in great masses of panicles or clusters on long stems, so profuse as to fairly cover the plant with a sheet of fleecy white. Its blooming period is in August and September, when most other vines have ceased, and it is then a sight to behold. Hardy as an oak. Price, 14c. each, 3 for 35c., postpaid.

FOUR BABY ROSES

BABY RAMBLER, Crimson—This is decidedly the greatest rose-novelty introduced in recent years, and a seedling of the well-known Crimson Rambler with which it is identical in all but habit of growth and blooming, being a pronounced dwarf, very quickly reaching a mature growth of eighteen inches to two feet which it rarely exceeds; as a bedding or border plant it is incomparable; a superb, rich, crimson in color, blooming in as immense clusters as its parent, the Crimson Rambler. The Baby Rambler is, in addition, a more continuous bloomer than the tender Tea Roses, bearing its wealth of flowers from early spring until frost. Grown as a pot plant, indoors, it is always in bloom. 12c. each; 3 for 30c., postpaid.

BABY DOROTHY, Pink—This is a splendid companion rose to the crimson Baby Rambler. It was originated by the same grower and is just as vigorous and free bloomer. Practically the only difference is in the color of the flowers which are a very bright and pleasing rose-pink. It is much the color of that charming climbing rose, Dorothy Perkins, hence the appropriateness of the name, "Baby Dorothy." It is perfectly hardy and blooms without cessation from early spring until late in the fall. As a pink bedding rose it has no equal. We have counted as many as 100 blooms to the cluster on three year old plants. 15c. each; 3 for 40c., postpaid.

WHITE BABY RAMBLER, (true)—This is identical with the two above except in the color of the flowers, which is pure snow white. It has the true rose perfume in a high degree; perfectly hardy and we pronounce it a real Rose Novelty. 15c. each; 3 for 40c., postpaid.

MRS. WM. H. CUTBUSH—A new Baby Rose of an entirely distinct color—light pink; of the same attractive habit of growth, and profuse flowering habit as other Baby Roses. The flowers are borne in huge trusses throughout the entire summer and autumn, and completely cover the entire plant. Fully as free flowering as the other roses of this type, and to our notion, the most attractive color of all. Entirely hardy. 15c. each, 3 for 40c.

The four Babies—one of each—for 46c., postpaid.

MONTHLY EVERBLOOMING TEA ROSES

UNCLE JOHN—A pleasing and constant bloomer; the bushes are never without flowers; buff yellow shading to white and pink.
WELLESLEY—Another New Rose, a seedling of Liberty crossed with Bridesmaid, retaining the form of Liberty with the fullness of Bridesmaid, and in color a beautiful shade of pink; in addition, it is a healthy grower, remarkably free-flowering, and possesses unusually good keeping qualities.

DUCHESS OF ALBANY, (Red La France)—Practically identical with the Pink La France all but the color which is much deeper, almost a pronounced red.

GOLDEN GATE—One of the new Roses of great merit; extra large, very double, deliciously fragrant, creamy white in color; beautifully bordered with clear rose; a constant bloomer.

PRINCESS BONNIE—This is one of the loveliest of ever-blooming roses. Its color is indescribable. A richer, deeper crimson was never seen in a rose, while its fragrance is as subtle and delicate as that of La France. It is a profuse bloomer, and as easy of cultivation as the most ordinary rose.

RICHMOND—Its fine, crimson, scarlet flowers are borne on long stems making it especially valuable for cutting purposes. The most largely planted of any American red Rose. Has as delicious fragrance as the American Beauty, and we believe that in a short time it will take the place of any other red rose.

White American Beauty

WHITE AMERICAN BEAUTY (Frau Karl Druschki)—This Hybrid Perpetual Rose is worthy of the name White American Beauty. The foliage is large and of heavy texture. The glory of this plant is its flowers, which are immense in size. An ordinary plant will produce hundreds of magnificent flowers, which are full, very deep and double, petals broad and long. The buds are egg-shaped, and long and pointed. The color is marvelous: snow-white without a tint of yellow pink, or any other color. It is hardy anywhere. 16c. each, 2 for 30c.

MARGARET DICKSON—This handsome new white Hybrid Perpetual Rose was raised and sent out by the Messrs. Alexander Dickson & Son, of Belfast, Ireland. We do not hesitate to say it is the best Hardy Hybrid Perpetual Rose for the garden. White in color with pale flesh center; petals very large, shell shaped, of immense substance. 15c. each, 3 for 40c.

THE BEST HARDY CLIMBING ROSES

EVERBLOOMING CRIMSON RAMBLER—Is found in almost every flower garden, as it is perfectly hardy in all parts of this country, and there appears to be something lacking in the appearance of the well-kept residence if it is not found trailing its way, displaying its clusters of beautiful crimson flowers about the veranda.

Now we have to offer the "EVERBLOOMING CRIMSON RAMBLER" as a glorious improvement. It is the old Crimson Rambler in growth and flowers, but it is an everbloomer, blooming continually all the season.

Strong Plants, 15c. each, 3 for 40c.

DOROTHY PERKINS—This beautiful hardy climbing Rose could be called Pink Crimson Rambler, for it is just like it except in color, which is a most beautiful Shell Pink. Flowers are large size, borne in clusters of from 10 to 12 and are very double. It is exceedingly hardy, vigorous growing, making a growth of 10 or 12 ft in a season; very free bloomer, flowers sweet scented. 12c. each, 3 for 30c. postpaid.

WHITE DOROTHY PERKINS—A pure white sport from the well known Dorothy Perkins, which it exactly resembles in habit of growth. Is a splendid companion for the pink variety, as it flowers at the same time. Was awarded a gold medal by the National Rose Society of England, also given an award of merit at the Temple Show in London, Eng. 15c. each, 3 for 40c., postpaid.

THOUSAND BEAUTIES—This beautiful novelty surpasses all other climbing Roses, both in growth, foliage and beauty of bloom.

Blooms profusely from June to end of July and the colors run through different shades; pink, rose, carmine, with various tints of crimson, white, etc. Imagine a Rose producing on the same bush so many different colored flowers; impossible to describe or even picture the varieties. A single cluster of flowers is a bouquet of itself, hence its name "Thousand Beauties."

It is hardy, a strong, vigorous grower, nearly thornless, and a grand rose for porches, trellises, etc., 15c. each, 3 for 36c., postpaid.

Japanese Chrysanthemums

JAPANESE CHRYSANTHEMUMS

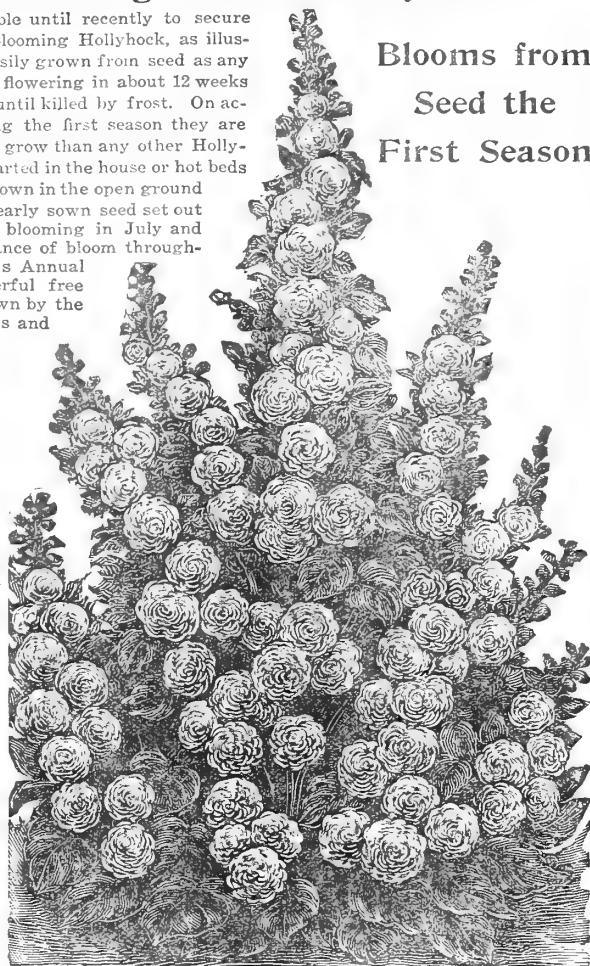

EASILY RAISED FROM SEED

We have succeeded in securing a wonderful collection of Japanese Chrysanthemum seed and there is hardly any flower produced from seed that can take the place of this. Think of seed producing all the curious and odd shaped flowers as shown in the illustration. Our mixture is composed of all the best Japanese and Chinese varieties, which are imported from Japan. Among the curious shapes and beautiful colors will be found the Ostrich Plume sort, twisted and curled, and nearly all shades you can imagine. In addition to the Japanese variety, we include the Annual Chrysanthemums which produce large flowers of crimson, gold and white colors. No matter how many plants you raise there will hardly be any two alike. The entire mixture of seed soon begins to bloom and by winter the plants are large enough to produce a gorgeous display of flowers. Fine Mixed, all varieties, shapes and colors, Pkt. 6c., 3 pkts, 15c.

54 Everblooming Annual Hollyhock

We have been unable until recently to secure seed of the true Everblooming Hollyhock, as illustrated. They are as easily grown from seed as any annual and commence flowering in about 12 weeks and continue to bloom until killed by frost. On account of their blooming the first season they are much more desirable to grow than any other Hollyhock, as they can be started in the house or hot beds in March or April, or sown in the open ground in May. Plants from early sown seed set out in May will commence blooming in July and will produce an abundance of bloom throughout the season. This Annual Hollyhock is a wonderful free flowering sort, as shown by the illustration. The forms and colors among the flowers would be a surprise to anyone. They are produced in double flowers, semi-double, single saucer shaped flowers, some with smooth edged petals, while others are fringed and of various shapes and shades. The flowers are usually very large, sometimes measuring over five inches across. For great variety of color we know of no Hollyhock that will make such a gorgeous display as the colors and markings are beyond description and should be grown to be appreciated. The plants grow very strong and vigorous and are of a branching habit. The center spike will attain a height from 7 to 9 feet but it can be kept at any desirable height by pinching off the top. To get the best results plants should be set in thoroughly rich soil and kept watered in dry weather.
